Office Action Summary

Art Unit: 3753

This action is responsive to the communication filed May 21, 2003.

Applicant's argument that "airflow" cannot be treated as an intended use recitation in a method claim is well taken. The error is regretted.

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-11, drawn to a diffuser, classified in Class 137, subclass 561A.

II. Claims 12-22, drawn to a method of providing laminar airflow, classified in Class 137, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (M.P.E.P. § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as turbulently diffusing nitrogen or steam.

Because these inventions are distinct for the reasons given above and the examination required for each Group is not the same

Serial Number: 09/986758

Art Unit: 3753

as for the other Group(s) restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry concerning this communication should be directed to Examiner Fox at (703) 308-2595 or John.Fox@uspto.gov. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0861.
